

DONGALA TEJASWI
INFORMATION TECHNOLOGY (B.Tech)

tejaswidongala@gmail.com | 9502985386 | [linkedin.com/in/tejaswi-dongala](https://www.linkedin.com/in/tejaswi-dongala)

OBJECTIVE

Motivated and detail-oriented IT graduate with hands-on experience in **Android development, Machine Learning, NLP, and Generative AI**. Passionate about building **real-world applications** using modern technologies such as **LLMs, RAG, cloud services, and automation tools**. Seeking an entry-level role where I can apply my technical skills, problem-solving abilities, and continuous learning mindset to contribute to innovative and impactful software solutions.

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2026	B.Tech(IT)	Bhojreddy Engineering College For Women(BRECW)	8.7/10
2022	Class XII (TSBIE)	Narayana Junior College, Kuntloor	92.8%
2020	Class X (TSBE)	Teja talent school,kodad	10/10

PROJECTS

Smart Emergency Medical Assistant | Android, Firebase, GPS APIs

Built an Android Medical SOS app with real-time GPS tracking and instant alerts (SMS/calls).
Secured emergency and medical data using Firebase cloud services.

Eligibility Assist | PHP, Java, HTML, CSS

Developed a government exam prep portal with syllabus access, registration, and email alerts.
Improved usability through responsive UI and streamlined navigation.

AI Agent Automation System | n8n, LLMs, GenAI

Built autonomous AI workflows using LLM reasoning and n8n automation pipelines.
Implemented multi-step task execution using prompt engineering and APIs.

NLP Restaurant Chatbot | FastAPI, Dialogflow, SQL

Created an NLP chatbot with intent detection and entity extraction for restaurant queries.
Integrated SQL-based recommendation engine with FastAPI backend.

Equity Research Assistant (RAG) | LLMs, NLP, GenAI

Developed a GenAI-based equity analysis tool using RAG and embeddings.
Implemented sentiment analysis, summarization, and risk scoring.

Myntra Clone | HTML, CSS, JavaScript

Designed a responsive e-commerce UI with product listings and navigation.
Optimized frontend for smooth performance across devices.

Machine Learning Web App | Python, ML, OpenCV

Built ML models for wine quality prediction.
Implemented image-to-sketch conversion using OpenCV.

LangChain Knowledge Graph (T5) :Built a knowledge graph pipeline for summarization & Q&A.

Integrated embeddings with **vector stores** for efficient retrieval.

MLFlow Experiment Tracking :Logged parameters, metrics, and artifacts for reproducible ML pipelines.'

Stock Prediction MCP :Developed a stock price prediction model using historical data and ML algorithms.

Performed **data preprocessing, feature engineering, and model evaluation**.

Achieved accurate trend predictions to support investment.

LinkedIn Post Generator (GenAI Project)

Developed a **GenAI-based LinkedIn post generator** using **LLaMA 3.1** and **LangChain** with few-shot prompting.
Integrated **Groq API for high- speed LLM inference** and built a **Streamlit interface** for dynamic post generation.

CERTIFICATIONS

- Data Visualization Certificate – CSRBOX
- Java Course Completion-Great Learning

SKILLS AND EXPERTISE

Languages: Java, Python, SQL
Web Technologies: HTML5, CSS3, JavaScript
Mobile Development: Android (Java, XML)
AI / ML / NLP: Machine Learning, NLP, LLMs, RAG, OpenCV
Databases: MySQL, Firebase Realtime Database

ACHIEVEMENTS & EXTRA CURRICULAR ACTIVITIES

- 1st Place, Poster Presentation (Vignan College) for developing a Deep Learning–based live image-to-sketch system using edge detection.
- 1st Place, Hackathon Competition at IJNASE National Technical Event, BRECW.
- 1st Place, Poster Presentation at IJNASE National Technical Event, BRECW.

EXPERIENCE

AI/ML Intern – FX.is.AI

- Developed end-to-end AI/ML solutions in research and production pipelines.
- Built **LinkedIn post generation models** using LLMs and MLFlow for experiment tracking.
- Implemented **RAG (Retrieval-Augmented Generation) pipelines** with vector databases for enhanced knowledge retrieval.
- Worked on **LangChain-based knowledge graph pipelines** integrating T5 models for advanced text summarization and Q&A.
- Collaborated on deploying ML models, tracking metrics, and versioning experiments using **MLFlow**.
- Gained hands-on experience in **LLM fine-tuning, embeddings, vector databases, and AI system design**.
